SMCO, a division of Sorrentino Mariani, is proud to introduce our new collection of furnishings specifically designed for use in Senior Living communities. Proudly made in the USA.
As a company, we take great pride in our quality craftsmanship, commitment to the environment, and diverse American workforce.

**EVIDENCE-BASED & CUSTOMIZABLE**

Our Senior Living Collections are created using evidence-based design which benefits residents as well as staff.

- The backs of our case goods are vented
- Our corners are rounded
- Our durable finishes make them easy to clean
- Furniture heights and clearances meet accessible transit lodging standards

The primary feature that makes our senior living furniture ideal for any setting is our ability to customize. If your needs are not met by what we offer, we can modify existing groups or design highly customized pieces that will fit your requirements and your budget.

**AMERICAN MADE FOR YOUR BENEFIT**

Our quality wood and wood products come from trees grown in North American sustainable forests. Waste and by-products are recycled. Our suppliers are certified by the Appalachian Hardwood Association, which requires that for every tree harvested, three are planted.

- Finishing products used at SMCO promote better air quality and are low VOC and low HAPS.
- Our glues are formaldehyde free.
- Most of our suppliers ship from within 500 miles of our factory. We highly recommend blanket wrapped deliveries to eliminate the waste and disposal of cartons that would end up in landfills.

SMCO is an All-American furniture factory from our wood to our workers. This helps the customer and the American economy. Manufacturing in America helps us maintain clear communication with our clients and our suppliers. Another benefit is that our customers receive the best price possible. Since there is no need to ship across an ocean, customers experience a reduced freight cost and on-time delivery. All of these things help our prices remain competitive and continue to keep customer service high on our list of priorities.

When it comes to our Senior Living Collection, none of this can be truer. From purchase order to delivery we will be with you every step of the way to make obtaining quality crafted furniture that fits your senior living environment, as well as your budget, a smooth and painless process. Every step of the way, SMCO is committed to you.

Rest assured that every piece you receive from SMCO is manufactured to the highest of standards by an American workforce in the port-side city of Norfolk, Virginia. Their spirit is the reason our furniture will always have heart.

To learn more about Sorrentino Mariani and SMCO, we invite you to go to our website, www.smfurniture.com.
Features & Benefits

1. High Pressure Laminate Top.
   Highly durable, prevents scratches and resists water.

2. 1/2” Thick, 9 Ply Baltic Birch Plywood Drawer Box with English dovetails on all four corners. Separate and detachable drawer face for easy repair and adjustment. Clear coat finished wood or high density white hardboard drawer bottoms available.

3. 100 lb. Rated Ball-Bearing Side Glides, well-fitted, long lasting with minimal side-to-side movement. All drawer bottoms fully captured and glued.

4. Maple, Oak, Cherry, Mahogany or Walnut Veneers, select solids based on best use practices. All wood products are from North American Sustainable Forests.

5. Solid Wood Legs, Stiles, Face-Frames, and Base Moldings. Resists damages from impact during use and cleaning.

6. Nine Step Finish with Pre-catalyzed top coats. Highly durable finish which resists fading and yellowing. Highly durable, resists water, most chemicals, and cleaning solutions. This finish has low VHAPS (volatile hazardous air pollutants) and a high solid content that is earth friendly.

7. Vented Wood or Printed Backs Where Specified
   (Varies per group)

8. Recessed Back Panel.
   Allows case to be placed flush against walls without interfering with electrical cords.

9. All Legs, Base Moldings and Face Frames
   have carpet glides and/or leg levelers. (Varies per application)

10. If Design Dictates The Use Of A Plinth Base With side panels to the floor all bottom edges are sealed with PVC edgebanding.
Streamlined silhouettes, the bold blend of woods and metals, and a strong geometric presentation define the SMCO Modern Collection. As with all SMCO lines, our Modern Collection can be customized to meet the exact specifications of your senior living environment.
Freemason

Freemason is a bold and exciting alternative to standard senior living furnishings. The angled legs and oversized crowns add drama to Freemason’s low profiled lines while the Asian inspired design and dark witchcraft finish give Freemason its sophisticated styling. Freemason is the perfect furniture line for those looking to create a contemporary environment.
The contemporary lines of Freemason add a sophisticated look to any environment.

Redgate is the perfect collection for those seeking clean modern furniture. The Redgate Collection has a simple elegance thanks to well designed features that include recessed panels, curved handles and a rich, dark finish. In addition to the standard pieces available in all lines, Redgate offers a three-drawer nightstand.
The Redgate Collection features recessed panels.

Redgate’s 3-Drawer Chest is available in widths of 30, 36 and 42 inches.

TERMS & CONDITIONS

All orders are subject to available line time and management approval. All orders must be in writing and shall be deemed accepted when the corporate office in Norfolk, VA issues a written acknowledgment. This confirmation serves as a contract once signed between SMCO and the buyer.

Line Time
Total estimated line time for most jobs is 8 to 10 weeks. The line time on an order begins when SMCO has verified the validity of the items ordered by the receipt of the deposit and the signed confirmation, accepting all terms, by the buyer.

Shipping
FOB Factory, Norfolk, VA. All quotations are based upon shipping blanket wrapped via air-ride trailers, with driver assist, full replacement insurance. While we will help coordinate all bids and deliveries and help with any freight claims, all charges and terms are negotiated strictly between the buyer and shipper. All shipments must be carefully inspected for shortages, and visible and concealed damage upon arrival. All freight claims must be noted on the carrier receipt and signed by the delivering driver. Freight claims are to be filed directly with the shipper.

IMPORTANT NOTE: There is an upcharge per case if cartons are required.

Credit & Payment Terms
50% Deposit with order entry / Balance Net 10; or, 1/3 Deposit with order entry, 1/3 prior to shipment and 1/3 Net 10, upon credit approval. A credit application will be furnished. Invoices relevant to partial shipments are payable as they fall due.

Custom Capabilities
As part of our endeavor to offer the buyer every resource available through SMCO we routinely offer assistance with custom design and special size requirements.

This design service has been used by scores of clients for the realization of their concepts. We welcome your ideas and special needs, and will carefully review them and submit a cost proposal for your consideration. The feasibility of this program is dependent, of course, on minimum quantity limitations; the scope of our capabilities is otherwise nearly unlimited. Once the client has verified that pricing is within their budget requirements, SMCO will develop and forward furniture drawings and elevations.

Warranty
All merchandise is manufactured in accordance with our high industrial and design standards and is warranted to be free from defects in material and workmanship for a period of five years, and protected with a lifetime guarantee on all drawer slides, from the date of delivery or placement in storage. This warranty serves as a contract once signed between SMCO and the buyer.

This warranty becomes null and void on any goods repaired or altered by any person not so authorized by SMCO or any merchandise which has been subject to misuse, improper storage, or negligence.

GENERAL CONSTRUCTION

• Panels and joints doweled, glued and pocket screwed in two directions. All cases accurately fitted and rigidly secured under pressure using European case clamp techniques.
• Commercial grade glue with all excess glue cleaned from surfaces exposed during normal use.
• All structural members glued and screwed in place.
• All tops (unless otherwise specified) surfaced with high pressure laminate with a minimum 45 lb. density industrial grade particle board core with fine face particles and proper backing sheet to prevent warping. Tops are laminated using contact, semi-rigid (PVAC), or rigid (ureas, resorcinol) adhesives, to provide for type two (2) bondage. Edges, as specified by customer, are either wood, veneer, MDF, or self edged. Where marble, granite or similar approved tops are used, a sub-top of 1/2” (minimum) plywood will be provided.
• Off the floor cases over 60” in length have center supports.
• All screws, square headed #8 and #10, with sufficient screw bite where applicable.
• Clamp nails used on mitered bases and aprons where applicable.
• Wood dowels 8mm D x 35mm L hardwood.
• Drawer front construction 3/4” thick cores, 3-ply veneer edged banding on all four sides. Solid wood with edge profile if specified. Five (5) sided box construction, with 1/2”, 9-ply, Baltic birch, sanded and splinter free. Dovetail construction. Bottoms 1/8” thick white epoxy-coated masonite, resistant to spills and stains. All perimeter construction bead glued, wood blocked and captured.
• Side mounted steel ball-bearing glides, 100LB. H.D., positive out stop, lifetime guarantee. Mounted with wood rails and appropriate screws.

MATERIALS

• All exposed wood and unexposed solid parts made from select hardwoods and are sound with no splits, checks, knots, tears, open glue lines, wormholes, windshades or other defects that might affect strength or appearance.
• All unexposed solid wood members are hardwood and are free from defects which would affect appearance or serviceability. All wood materials kiln-dried to moisture content of 6 to 7%.
• Exposed veneer surfaces shall be select sliced hardwood, and are matched as to pattern and color. All face veneers and balancing back veneers shall be applied with waterproof glue under controlled pressure. To control and contain veneer checking, all crossbands for fancy-faced veneer have uniform multi-directional strengths.
• High-pressure laminates meet the federal specification common to the industry (LP508H). Minimum standards for casegood tops are:
  - Formica GP .030
  - Micarta GP .030
  - Nevamar GP .030
  - Pionite GP .030
  - Wilsonart GP .030

  The use of PF. and HF4 grades of laminate is used on vertical applications if specified.

• Wood, particleboard or MDF cores shall conform to commercial standards Type 1, Grade B, Class II. 45 lb. density industrial weight. 3-to-5 ply construction with backer, 3/4” thick.
• Hardware, unless otherwise specified, can be selected from our website. All hardware is coated to prevent rusting and tarnishing. Lancaster finish unless otherwise noted in customers specification.
WORKMANSHIP

All work is conducted under direct supervision of competent and experienced woodworking specialists and engineers.

- Backs are captured and screwed on for secure fit. All backs are recessed for cord management. All nightstand back are vented.
- Bottoms and legs are solid hardwood. If a plinth base is used with side panels to the floor, the bottom edge will be sealed with PVC edgebanding. All cases have either carpet glides or leg levelers.
- Doors are to be free of rattle, squeaking, warp or rubbing. All doors to be approximately uniform in clearance. Catches properly aligned and installed.
- Drawers are free-running with no binding or sticking. Drawers with side mounted metal glides shall operate freely with no squeaking or rattling. Drawer guides and runners securely fastened and properly positioned to assure correct drawer alignment.
- Route lines, cut-outs, or grooves smoothly machined and/or sanded. Shapes, carvings, and “U” cuts are to be finished smoothly with no visible unfinished or rough areas.
- Drawer interiors and storage compartments are to be sanded smooth and free of glue or lacquer runs. Sides, ends and bottoms are to be free of splinters, snags, slivers, staples, nails and screws.
- Hardware, such as hinges, pulls, latches, catches, glides, etc., attached so they fit and operate properly and serve their purposes during transit and use.
- Mitered corners to be square, flush, tight and well-glued
- Interior screws flush or countersunk, except on drawer heads, with the surface of the part where used.
- Glides, casters and ferrules properly attached to remain permanently in place at all times.
- Face-nailed molding and overlaps nailed as inconspicuously as possible with nails countersunk and filled where applicable. Backnailing used wherever possible.
- All desk tops and oversized pieces are reinforced with a solid member or metal sag rail on the front edge, or with an H-section solid wood brace as appropriate.
- All items furnished under this section shall be guaranteed against manufacturing defects in workmanship and materials. Repairs of such defects during the first year, after final completion and acceptance, shall be made by the manufacturer at its cost and expense without charge to the purchaser or the facility. All such replacements and repairs shall be made at a time and at hours mutually satisfactory to both the owner and factory.

APPEARANCE & FINISH

- Color of like finishes are color-fast, uniform, and compatible between pieces manufactured in the plant.
- Each finishing material is formulated and the individual batch checked to insure compatibility with the batch and every other material used to produce a color-fast finishing system.
- Distressing, shading, highlighting and splatter in any one group shall be consistent and uniform between pieces and from one cutting to another.
- Interior surfaces of compartments and drawers are to be free of dirt, dust, shavings or any foreign matter prior to finishing.
- Finish rubbed to required smoothness and sheen and dried to prevent marring or printing on the surface when packed.
- Edges and backs of doors and drawers are finished to be compatible with exterior.
- Excess pumice, oil, wax and rubbing compound is wiped clean after rubbing.

Our 9-Step Finishing Process

1. All pieces sprayed with wiping stain and/or washcoat and/or toner.
2. Filler applied as required to fill wood pores. All excess filler is removed and allowed to dry.
3. Sprayed with sealer of not less than 16% to 20% solid content.
4. Sealer is sanded smooth, finishing with paper.
5. Shade with shading stain as required to obtain uniform color and effect.
6. Glaze when required for effect and wipe.
7. Sprayed with two coats of moisture-resistant lacquer (sanded between lacquers).
8. Rubbed with steel wool, wet or dry finishing paper, waxed and wiped clean as desired for the required sheen specified.
9. Laminate surfaces are cleaned with cleaning agents and wiped dry before packing.
